Re: Tentative Approval to the Notice of Intention to Commence Large Mining Operations, Utah Alunite Corporation, Blawn Mountain Mine, M/001/0082, Beaver County, Utah

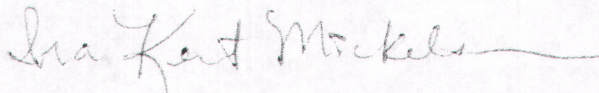

Dear Ms. Dean:

Ira Kent Mickelsen want(s) to voice support for the Approval of the Notice of Intention to Commence Large Mining Operations for the Blawn Mountain mine. The project's positive impact on increased well paying jobs in rural Utah and the ability to sustain long term job growth that will economically benefit small business owners, local work force and allow these rural communities to grow and prosper. It will provide an added stimulus to economic activity and job creation statewide.

We not only appreciate the need for this kind of industry, but believe that it will positively impact the lifestyle of the local population by providing more opportunities for education, job training, and new skills training for high school and college students, as well as, adults. The Blawn Mountain project on State Lands, will allow for substantial royalties to be realized for the future of the State's school children. Since the project will have little impact on the environment in an area of the State where mining is one of the highest economic uses of land, the State should vigorously support this project.

Thank you for the opportunity to comment on the value and need for this project.

Sincerely,

Name Ira Kent Mickelsen
